

Okayo WT-350D

City Jungle Edition

The Okayo WT-350D is the digital counterpart to the analogue WT-350. This is the first two-in-one unit which, thanks to one switch, may operate either as a unidirectional or as a bidirectional device, allowing tour participants to put questions to the guide. The units are easy to use, light, and have a modern, urban design.

remote channel adjustment
in the receivers

range up to 100 metres
in the line of sight

built-in microphone
in the transmitter

original look
unique colour scheme
